WARNING:

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code.

Blue Neutral

Brown Live

For Australia model only.

FOR YOUR SAFETY

To ensure safe operation the three-pin plug supplied must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe. For your safety, if in any doubt about the effective earthing of the power point, consult a qualified electrician.

For U.S.A. and Canada models.

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

Video Input Function

The PMA-500V provides a video input function. The image selection circuitry gives preference to VIDEO-1 for all settings of the INPUT SELECTOR button, unless VIDEO-2 has been specified. This function might be used, for example, to watch a TV monitor while playing a compact disc. In this case it would connect the image input circuitry of the VIDEO-1 terminal to the image output of a video recorder, tape recorder, or video disc recorder. The resultant monitor out signal would be sent to the TV monitor, for "background video" audio-visual entertainment combining sound and images.

Note:

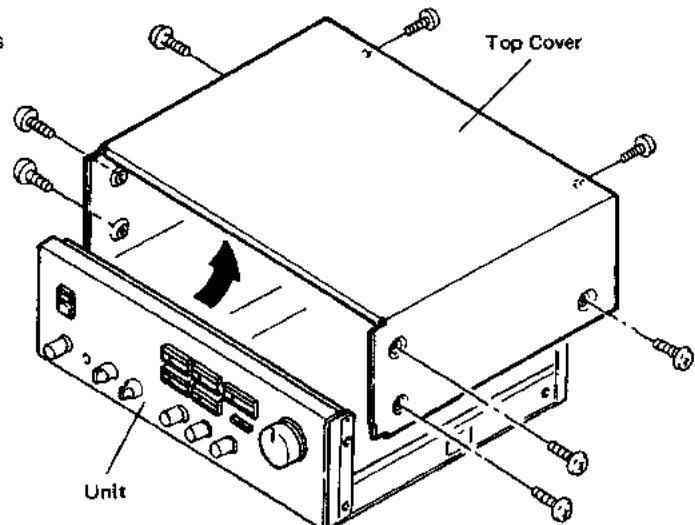

Please note the following differences in the markings on the front and back panels on the European U.K. and Australia models:

VIDEO-1 → AUX/VIDEO 1
VIDEO-2 → AUX/VIDEO 2
TUNER/AUX → TUNER

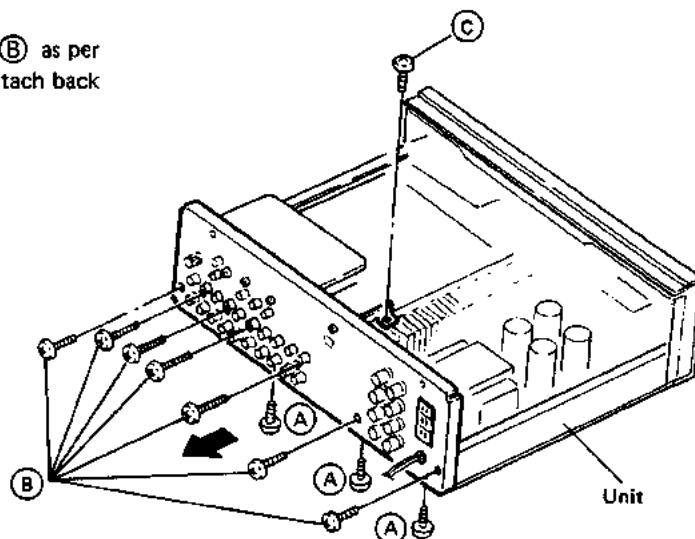

In addition, there is no AV mark on the front panel.

REMOVAL OF EACH SECTION**1. Removal of Top Cover**

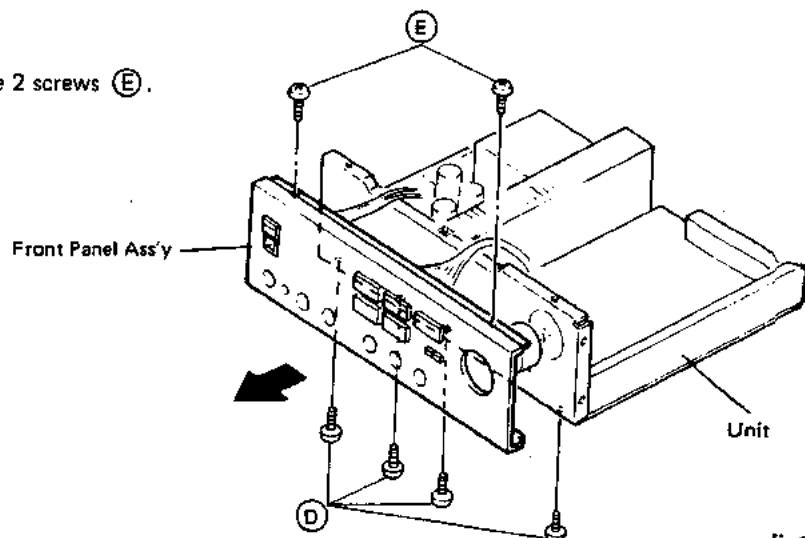

- Remove 8 screws and detach the top cover as per arrow in Fig. 2.

**Fig. 2****2. Removal of Back Panel**

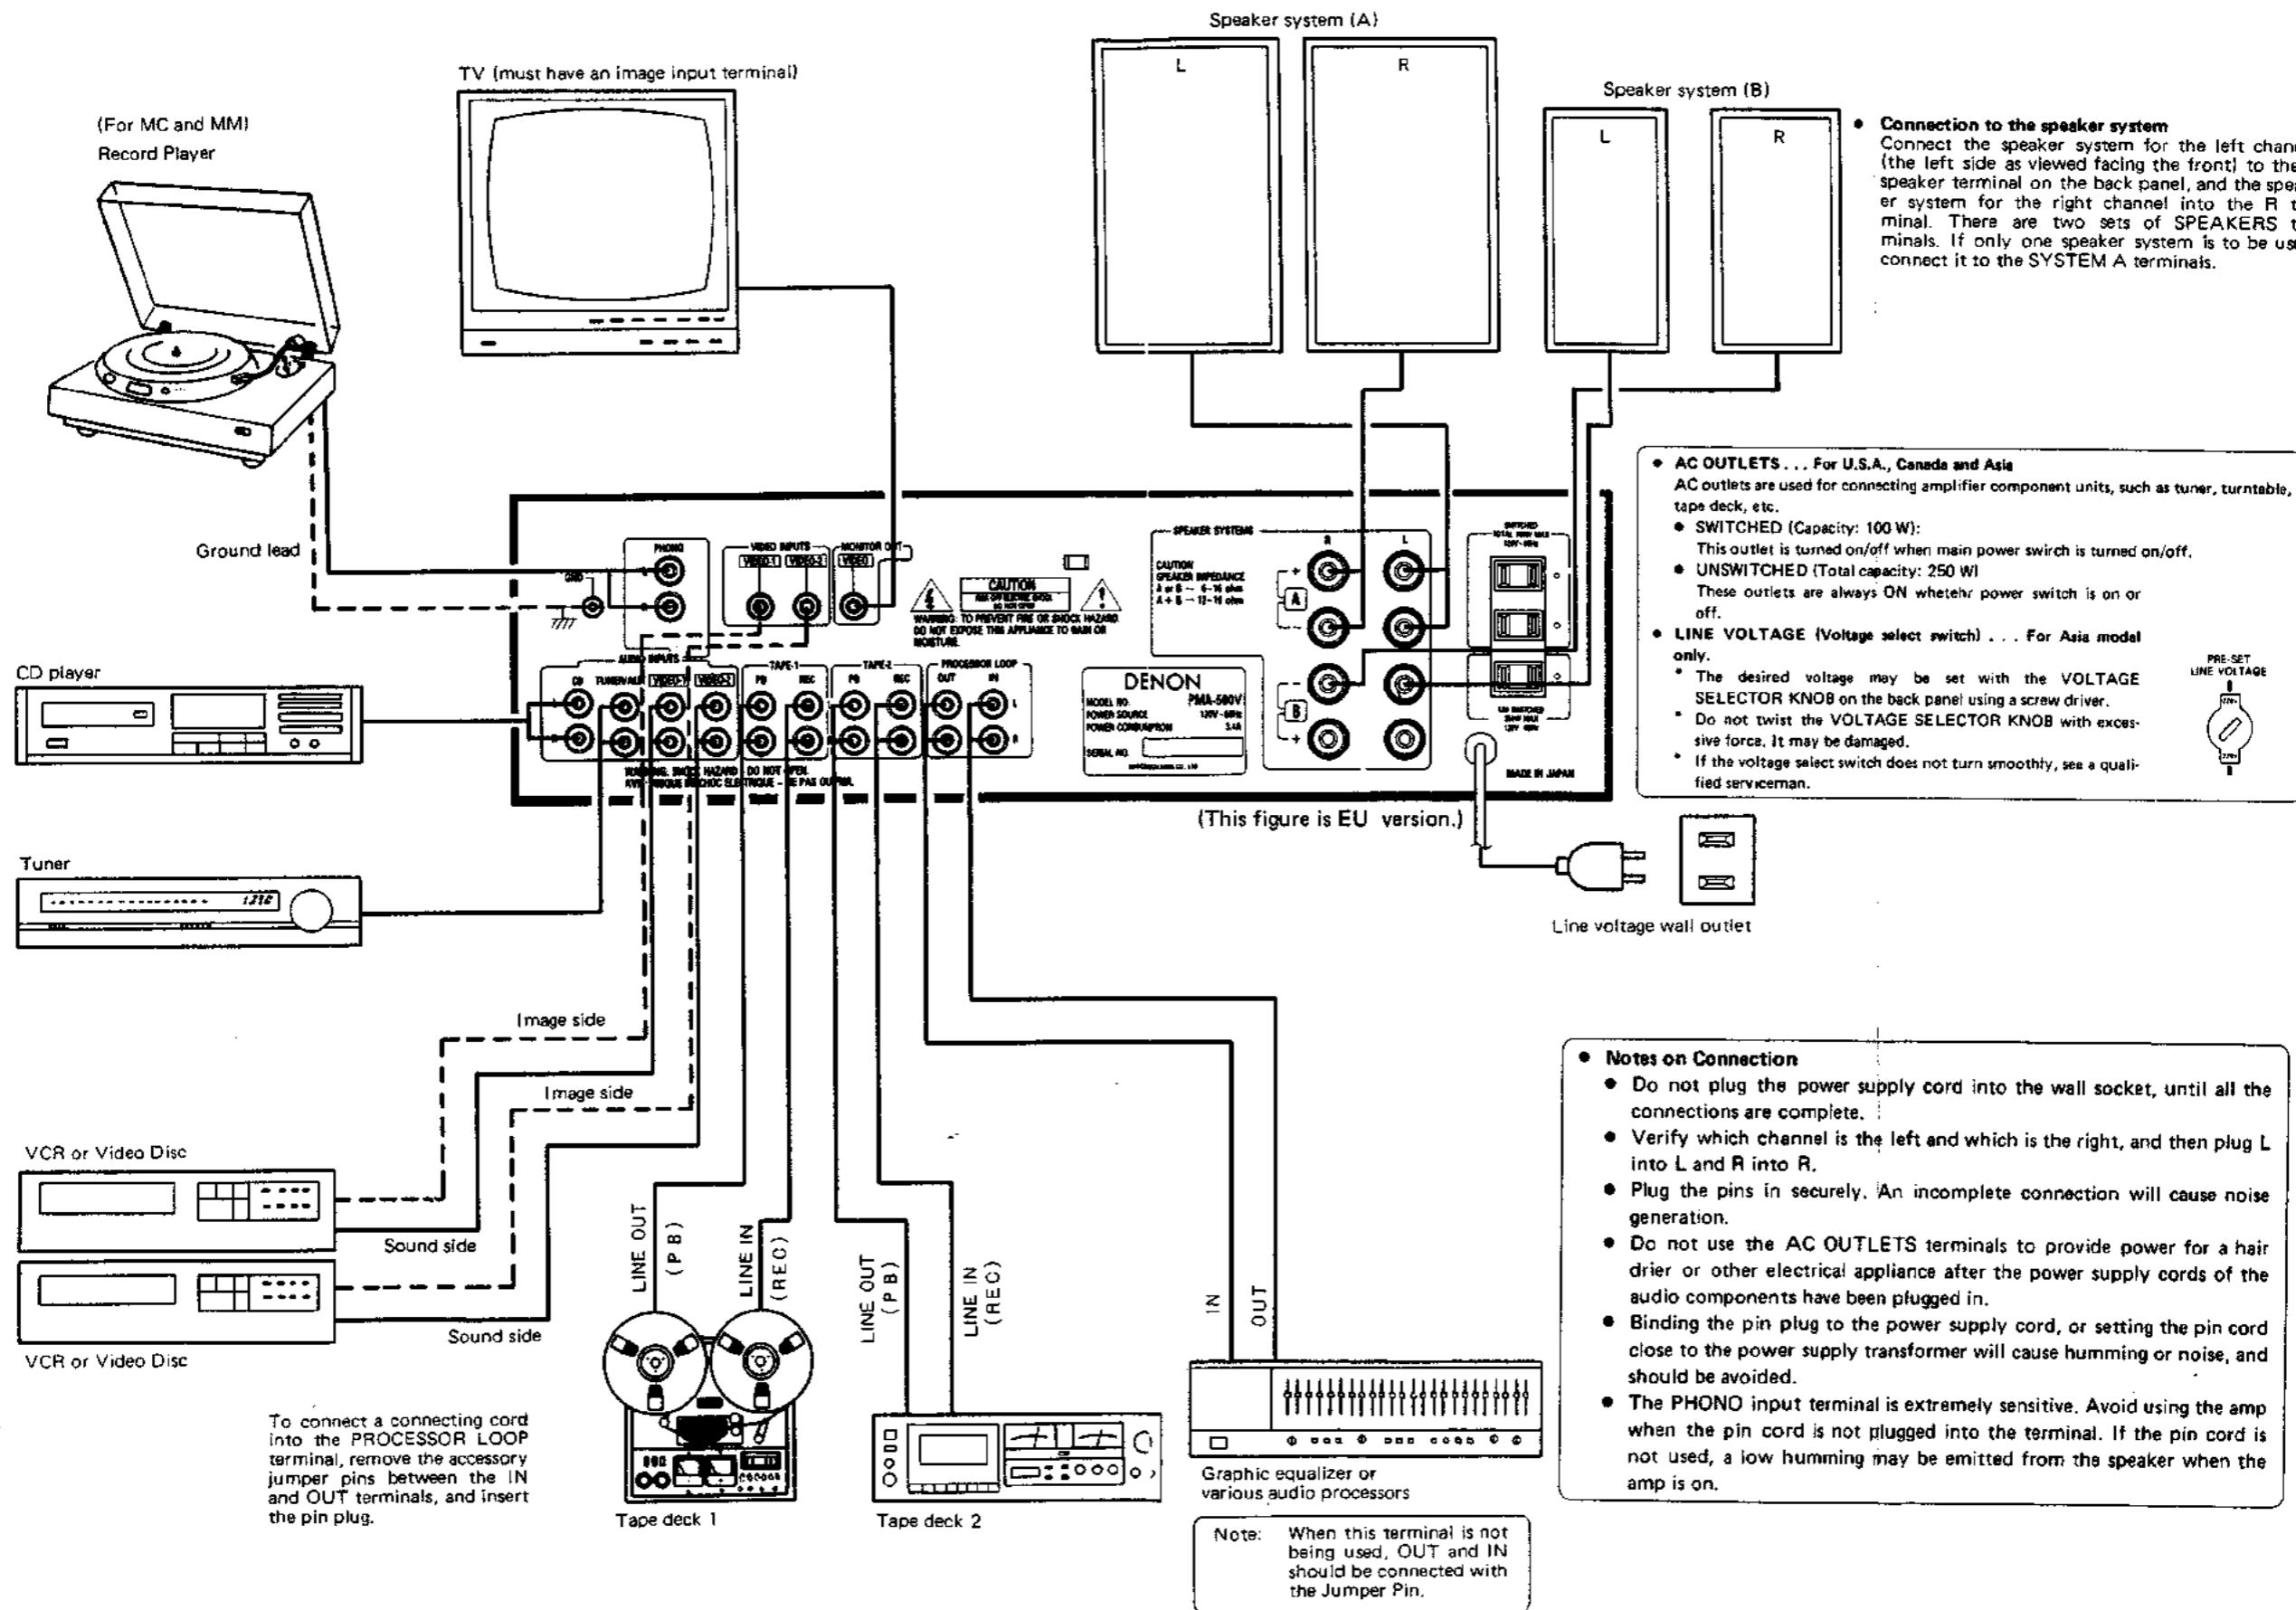

- Remove 3 screws (A) and 7 screws (B) as per Fig. 3. Also remove screw (C) and detach back panel from the unit.

**Fig. 3****3. Removal of Front Panel Ass'y**

- Remove 4 screws (D) and remove 2 screws (E). And draw out front panel ass'y.

CONNECTIONS

• Connecting a video device

Connect the output terminals of the video device (OUTPUT) to the VIDEO terminals of the amp, using a pin plug cord.

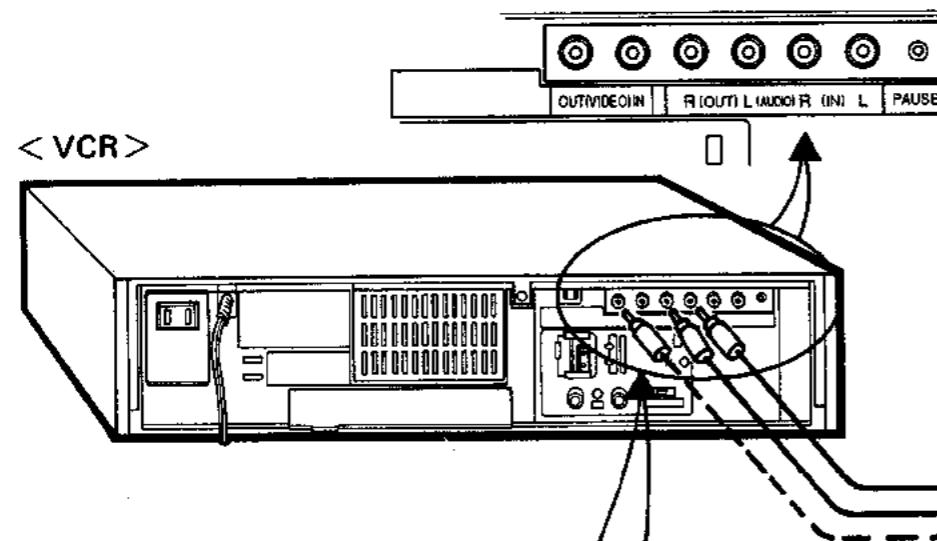

< Video Disc Player >

CONNECTING A VIDEO DISC PLAYER

(Ex.) Connect the video disc player to the VIDEO-1 terminal.
Video disc player terminals → PMA-500V terminals
VIDEO OUT (image) → VIDEO-1, VIDEO INPUT
AUDIO OUT (sound) → VIDEO-1, AUDIO INPUT

< VCR >

CONNECTING VCR

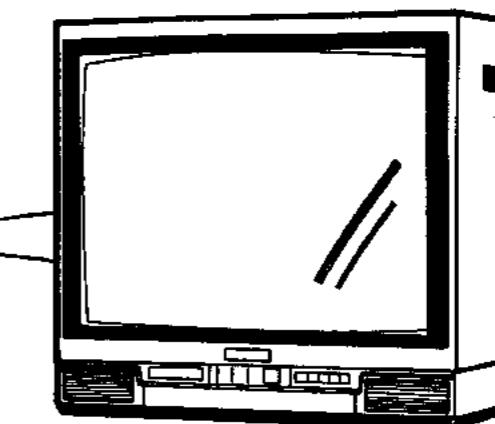

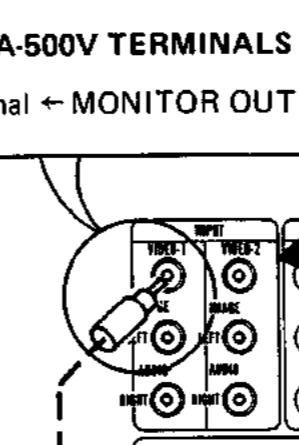

VCR terminals → PMA-500V terminals
VIDEO OUT (image) → VIDEO-2, VIDEO INPUT
AUDIO OUT (sound) → VIDEO-2, AUDIO INPUT
(Ex.) Connect the VCR to the VIDEO-2 terminal

• CONNECTING A VIDEO DEVICE

< TV (must have image input terminal) >

TV TERMINALS → PMA-500V TERMINALS

VIDEO INPUT

The PMA-500V has a VIDEO selection function. VIDEO-1 is automatically used for all playback functions, unless the input selection switch is set to VIDEO-2.

Connect the image output of a video device such as a VCR to VIDEO-1 for simultaneous playback with another medium, such as a compact disc.

METHOD OF ADJUSTMENTS

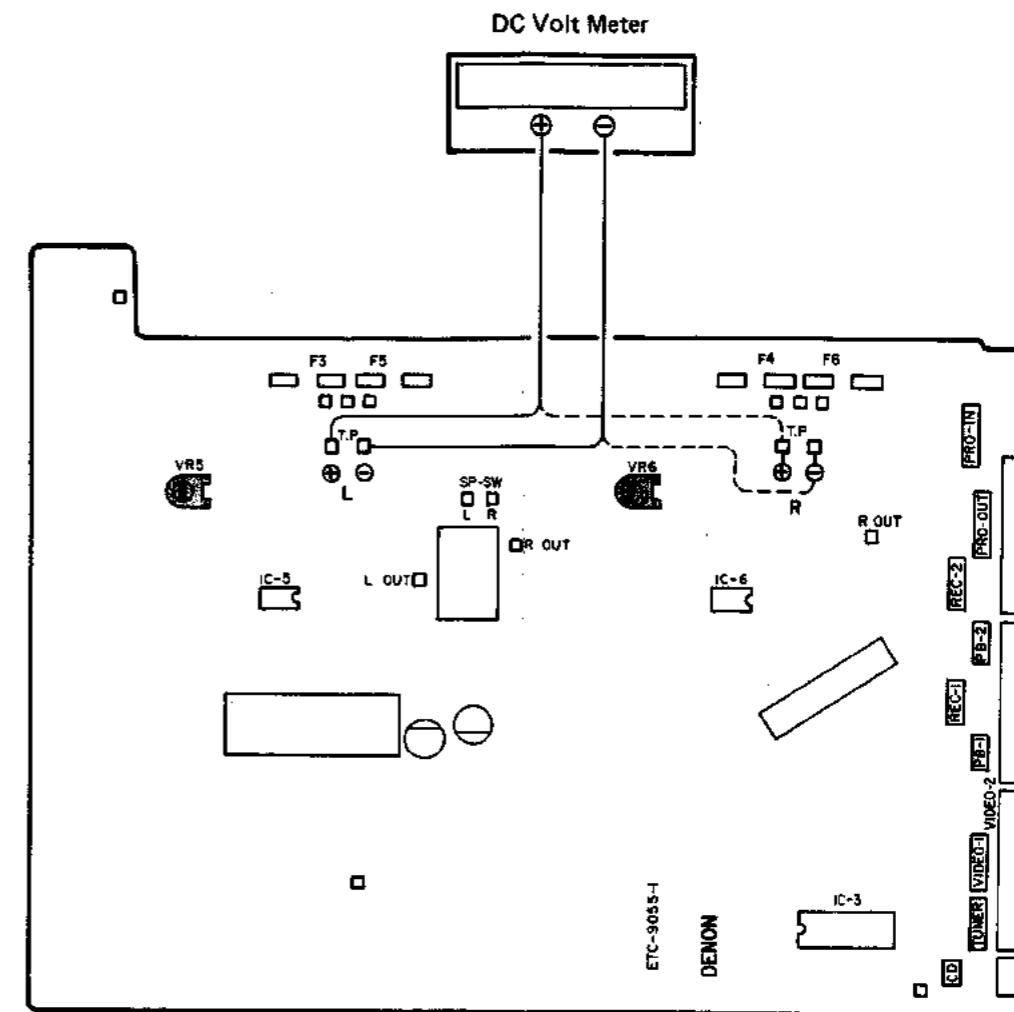

Fig. 8

IDLING CURRENT (Fig. 8)

• Setup

1. Lay the unit at an ordinary position away from a direct current from a cooler or fan. Do the adjustment at a temperature between 15°C and 30°C.
2. Set controls as follows.

POWER SWITCH → off (▲)
 VOLUME CONTROL → fully counterclockwise. (○ min)
 SPEAKER Terminals → open: do not connect the speakers, dummy load etc.

• Adjustment

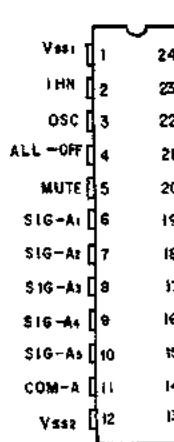

1. Remove Top cover. And then connect DC Voltmeter to Test points of ETC-9055-1 (INPUT & POWER Unit).
2. Connect Power cord to AC outlet, and turn Power Switch "on" (▲). Within 10 seconds turn VR5 (Lch) and VR6 (Rch) clockwise so that the DC voltmeter reads
 $1.5 \pm 0.1 \text{ mVDC}$
3. Then after 3 minutes warmup adjust VR5 and VR6 so that the DC Voltmeter reads
 $4 \pm 0.5 \text{ mV}$

WARNING:

1. Component parts

Parts marked with and/or shading in this service manual have special characteristics important to safety. Be sure to use the specified parts for replacement.

2. Leakage current

Before returning the appliance to customer, test the leakage current when the power plug is connected. Use a calibrated (with an error of not more than 5%) leakage current tester and measure the leakage current from any exposed metal to the earth ground. Reverse the power plug polarity and test the above again.

Any current measured MUST NOT EXCEED 0.5 millamps. Corrective measure must be taken if it exceeds the limit.
