400mV@500mV Direct Mode			400mV@500mV Direct Mode		
Tone control			Tone control		
Bass.....	=8.5 dB at 60 Hz		Bass.....	=8.5 dB at 100 Hz	
Treble.....	+9.0 dB at 20 kHz		Treble.....	+9.0 dB at 20 kHz	
Dimensions.....	415x390x188 mm (16.3x15.4x7.4 in.)		Dimensions.....	425.0x154.0x188.0 mm (16.7x6.1x7.4 in.)	
Weight.....	11.2 kg (25.2 lbs)		Weight.....	11.4 kg (25.2 lbs)	

* For improvemental purposes, specifications and design are subject change without notice.

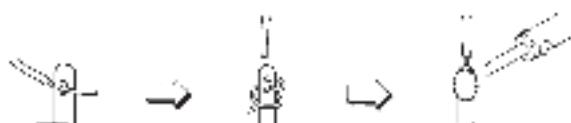

★SAFETY INSTRUCTIONS

PRECAUTIONS DURING SERVICING

1. Parts identified by the A symbol parts are critical for safety. Replace only with parts number specified.
2. In addition to safety, other parts and assemblies are specified for conformance with such regulations as those applying to spurious radiation. These must also be replaced only with specified replacements. Examples: RF converters, tuner units, antenna selector switches, RF cables, noise blocking capacitors, noise blocking filters, etc.
3. Use specified internal wiring. Note especially:
 - 1) Wires covered with PVC tubing
 - 2) Double insulated wires
 - 3) High voltage leads
4. Use specified insulating materials for hazardous live parts. Note especially:
 - 1) Insulation tape
 - 2) PVC tubing
 - 3) Spacers (insulating barriers)
 - 4) Insulation sheets for transistors
 - 5) Plastic screws for fixing microswitch (especially in turntable).
5. When replacing AC primary side components (transformers, power cords, noise blocking capacitors, etc.), wrap ends of wires securely about the terminals before soldering.
6. Check that replaced wires do not contact sharp edges or pointed parts.
7. Also check areas surrounding replaced locations.
8. Use care that foreign objects (screws, solder droplets, etc.) do not remain inside the set.

SAFETY CHECK AFTER SERVICING

Confirm the specified insulation resistance between power cord plug prongs and externally exposed parts of the set is greater than 10 M ohms, but for equipment with external antenna terminals (tuner, receiver, etc.) and is intended for C or A, specified insulation resistance should be headphones jacks line-in/out jacks etc. more than 2.2 M ohms (ground terminals, microphone jacks).

6. Observe that wires do not contact heat producing parts (heat sinks, oxide metal film resistors, fusible resistors, etc.).

★INFORMATION

SYMBOLS FOR PRIMARY DESTINATION

Alphabet indicates the destination of the units as listed below.

Symbol	Principal Destinations
A	USA
B	UK
C	Canada
E	Europe (except UK)
J	Japan
S	Australia
V	W. Germany only
U	Universal Area
X*	Custom version

VOLTAGE CONVERSION (J Mod, J only)

Before connecting the power cord, SET the VOLTAGE SELECTOR located on the rear panel with a screwdriver so that the correct voltage is indicated.

I. DISASSEMBLY

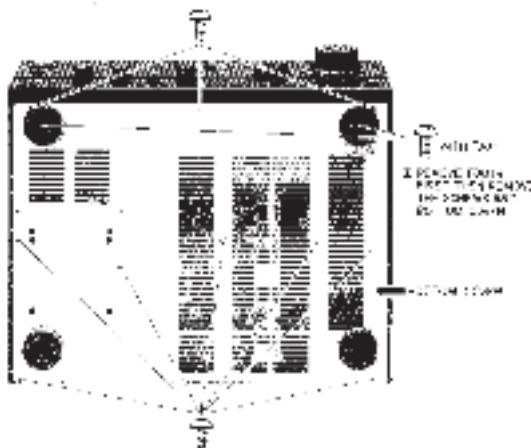

In case of trouble, etc., necessitating dismantling, please dismantle in the order shown in the photographs.
Reassemble in reverse order.

* Photographs employed here are of model AM-M32.

1. REMOVAL OF UPPER COVER

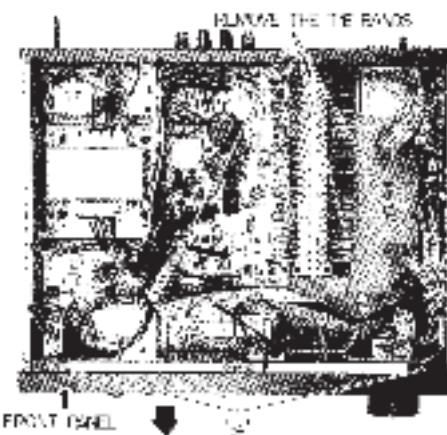

3. REMOVAL OF BOTTOM COVER

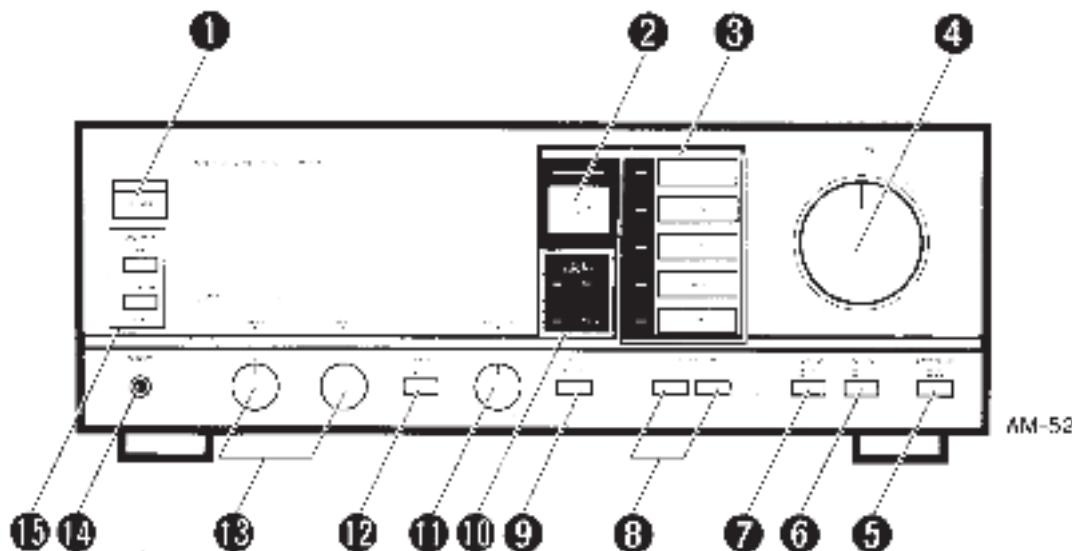

2

4. REMOVAL OF FRONT PANEL

II. CONTROLS

① POWER switch and Indicator

To turn on and off the amplifier. The indicator will light when the power is turned on.

② SOURCE DIRECT switch and Indicator

For clearer, low distortion playback of a compact disc, record, radio or DAT tape. The indicator will light when the switch is turned on. When the switch is turned on, the BASS and TREBLE tone controls and the BALANCE control are ineffective.

③ Input Select buttons [CD, PHONO, TUNER, AUX and DAT] and Indicators

For selection of a playback source. The indicator of the button you choose will light up when depressed.

④ VOLUME control

To increase or decrease playback volume level.

⑤ CARTRIDGE switch [— MC/ — MM]

Adjust according to the type of cartridge you are using.

⑥ MUTING switch

To reduce volume instantly during playback without using the VOLUME control.

⑦ LOUDNESS switch

For instant compensation of tone setting at low volume level.

⑧ TAPE MONITOR switch (AM-52 only: TAPE 1/TAPE 2)

For cassette tape playback or monitoring during recording operation.

⑨ MODE switch (AM-52 only: — MONO/ — STEREO)

To select the playback mode. Normally set this switch to — STEREO.

⑩ TAPE MONITOR indicator (AM-52 only: TAPE 1/TAPE 2)

Tells you the TAPE MONITOR switch is engaged.

⑪ BALANCE control

To adjust the left and right channel balance.

⑫ SUBSONIC switch [— ON/ — OFF]

To reduce unwanted ultra low frequency disturbance (less than 15 Hz) such as rumble during record playback.

⑬ BASS and TREBLE Tone Controls

To adjust the high note (treble) and low note (bass) levels.

⑭ PHONES jack

For headphone listening.

⑮ SPEAKER switch [SYSTEM A/SYSTEM B, — ON/ — OFF]

To select the speaker system.

Protection circuit

When the Akai amplifier is turned on, no signal will be output to the speakers for several seconds. This is due to the protection circuit which prevents output of noise when the Akai amplifier is turned on.

The protection circuit also functions during playback to protect the speakers from overloading, and to protect the circuit from damages. When speakers with less than rated impedance are used, the protection circuit will short-circuit the + and — speaker cords. Therefore, should the sound be cut during playback:

1. Turn off the Akai amplifier.
2. Check for and correct the cause.
3. Turn on the Akai amplifier.

III. PRINCIPAL PARTS LOCATION

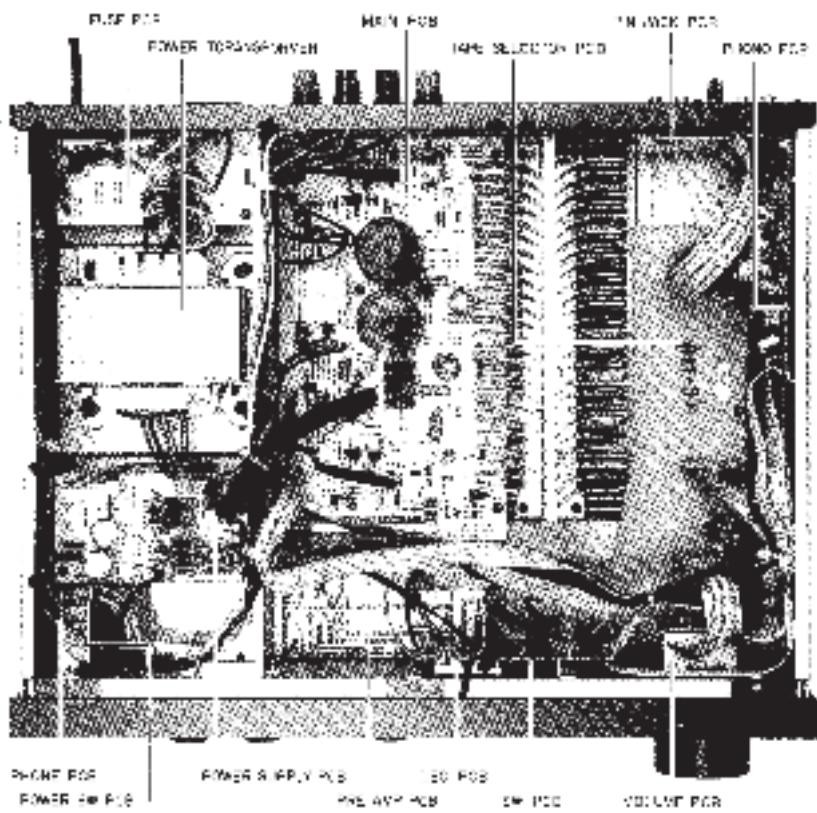

Fig. 3-1

IV. ADJUSTMENT

4-1. IDLING CURRENT ADJUSTMENT

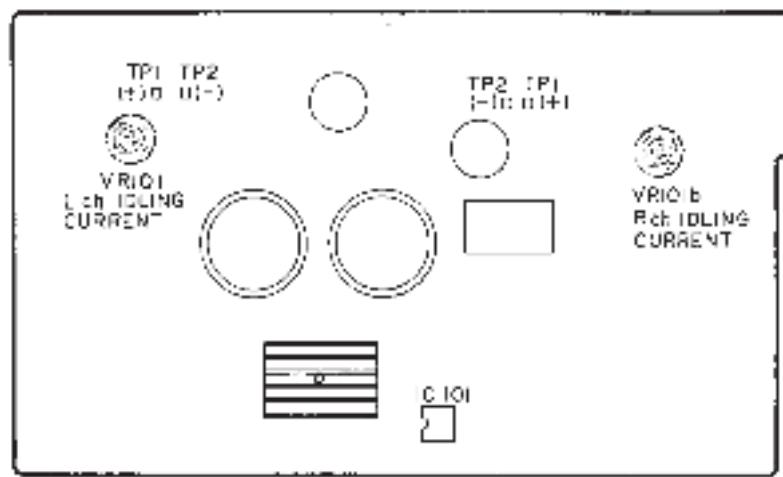

Fig. 4-1 MAIN PCB adjustment points

NOTE: This adjustment should be made after 20 minutes passed from turned on the power.

- 1) Connect a digital DC Voltmeter between TP1 (+) and TP2 (-).
- 2) Adjust VR101 (L ch) or VR101b (R ch) so that the reading on the digital DC Voltmeter is 20 mV.

V. PARTS LIST

ATTENTION

- When placing an order for parts, be sure to list Part No., Model No. and the description of each part. Otherwise, the non-delivery of the part or the delivery of a wrong part may result.
- Please make sure that Part No. is correct when ordering. If not, a part different from the one you ordered may be delivered.
- Since the parts shown in Parts List of Preliminary Service Manual may have been the subject of changes, please refer to the Parts List again before reference.

HOW TO USE THIS PARTS LIST

- This Parts List lists those parts which are considered necessary for repairs. Other common parts, such as resistors and capacitors, are listed in the "Common List for Service Parts" from which these parts should be selected and stocked.
- The Recommended Spare Parts List shows those parts in the Parts List which are considered particularly important for service.
- Parts not shown in the Parts List and "Common List for Service Parts" will not in principle be supplied.
- How to read the Parts List.

(a) Mechanism Block

2. HEAD BASE BLOCK

REF. NO.	PART NO.	DESCRIPTION

PC-1 MAIN AMP BLK CONSISTS OF FOLLOWING PC BOARD:

- ◆ MAIN AMP P.C BOARD
- ◆ POWER SUPPLY P.C BOARD
- ◆ PIN JACK P.C BOARD
- ◆ I/F P.C BOARD
- ◆ PHONE P.C BOARD
- ◆ FUSE P.C BOARD
- ◆ VOLUME P.C BOARD
- ◆ POWER SW P.C BOARD
- ◆ SOURCE DIRECT LED P.C BOARD
- ◆ POWER LED P.C BOARD

PC-1 PRE-AMP BLK CONSISTS OF FOLLOWING P.C BOARD:

- ◆ PRE AMP P.C BOARD
- ◆ TAPE SELECTOR P.C BOARD
- ◆ PHONE AMP P.C BOARD
- ◆ SWITCH P.C BOARD
